

Save the Dates.....Save the Dates.....Save the Dates

The Farmington Valley Asperger's Network (FAVAN) Presents:

## The Spectrum Unplugged March 25, 2008

FOCUS Alternative Learning Center is proud to present their panel of experts. They are articulate, brilliant, left of center and very open and honest about their journey with their disorders. Hear firsthand about their experiences and how they impacted their lives at home, school and in the community. They want to let you know that they have suffered, but they have not given up and have grown to accept and embrace their "peculiarities" and channel them into something useful, without changing "who" they are. These kids are amazing and their willingness to share their experiences to help others have hope and change their lives is inspirational! Learn what strategies have helped them become the successful people they are today.

## Kristen Powers OTR

on

Sensory Diet

April 29, 2008

This talk will be informative for both parents and professionals. What is a sensory diet? How can I help a child with ASD get the sensory information he/she needs? Ms. Powers has been practicing for over 15 years and is certified in Sensory Integration. She is the Coordinator of Rehabilitative Services at The Center for Children with Special Needs in Glastonbury.

Both of these presentations will be at the Farmington Community Center beginning at 7 pm at the dates indicated. There is no charge for these presentations, but donations are greatly appreciated.
